

IBM Infoprint 1130 and Infoprint 1140

Infoprint 1140

Infoprint 1130

Highlights

- **Deliver quick output for exceptional productivity**
- **Offer versatile finishing options for printing flexibility**
- **Integrate easily with multifunction options for scalable solutions**
- **Provide expert onsite repair from specially trained professionals**
- **Support efficient workgroup environments with exceptional printing solutions**

Meeting workgroup requirements effectively

To compete effectively in a demanding e-business environment, workgroups need affordable, reliable and scalable printing solutions.

Designed for medium- to large-sized workgroups, the IBM Infoprint® 1130 and Infoprint 1140 deliver high value, fast speeds, flexible connectivity and extensive input and output options, including high-capacity input, an output expander and a Lexmark StapleSmart Finisher™—the most affordable stapling finisher in this printer class.

Enabling quick output and high-quality images

With up to 30 page-per-minute (ppm) output delivery and a first-page-out time of less than ten seconds, the Infoprint 1130 can help you achieve fast turnaround and help make your workgroup more productive. The Infoprint 1140 meets your high-volume requirements by providing a comparable first-page-print time and an output speed of up to 40 ppm. Both printers provide 1200 x 1200 dots-per-inch (dpi) resolution for crisp text and high-quality graphics.

A standard USB interface on the Infoprint 1130 simplifies host connections, and built-in Ethernet ports on network models enable high-speed communications. Standard features include PCL 6 and PostScript® 3™ emulation. The IBM Intelligent Printer Data Stream™ (IPDS™) print capability is offered as an option. IPDS can interpret data from applications and use it to identify what data has printed, and what has not—even if an interruption occurs—for better error handling and recovery.

Facilitating printing flexibility with versatile finishing options

A StapleSmart Finisher option can conveniently staple and offset jog a wide range of documents for smooth, efficient workflow processes, and modular paper-handling options provide printing flexibility.

The customizable MarkVision™ Professional print management software from Lexmark—a standard feature—makes for easy setup, control and monitoring. MarkVision provides features including realtime printer monitoring and e-mail and pager notification of printer conditions and mass-device configuration.

You can easily print complex document applications with the extensive memory and ability of the Infoprint 1130 and Infoprint 1140 to handle a wide range of media. And an optional ImageQuick™ solution helps ensure quality printing of Web-based images as well as PDF, TIFF and other popular document formats.

Providing a scalable printing solution with multifunction capabilities

By upgrading the Infoprint 1130 and Infoprint 1140 with the IBM M20, M25 and M30 MFP Options, you can add full-function copy, fax and network scan capabilities, including fax from workstation, scan to e-mail and FTP. The M20, M25 and M30 can enhance production, and help improve process times, reduce costs and optimize device and space utilization.

Consolidated supplies for printing, copying and faxing can help reduce costs, user intervention and stock management. Optional document distribution software integrates into your workflow process to help eliminate manual workflow processes by automating document workflow activities, such as routing, indexing and archiving. And the M20, M25 and M30 provide intuitive user interfaces (the M30 has a color touchscreen), easy-to-use address book (the M30 adds enterprise directory integration), enhanced image processing and easy printer integration for demanding workflow requirements.

Relying on world-class service

With IBM onsite repair service offerings, you can be confident that specially trained customer engineers will come to your location to help keep your operation running smoothly. With IBM service, you receive high-quality, reliable support from experts with comprehensive knowledge of IBM printers, software and supplies. Next-day 9x5 and same-day 24x7 service offerings are available on all IBM printers in the U.S.

Relying on cost-effective output solutions from an industry leader

The IBM Infoprint 1130 and Infoprint 1140 can help you increase productivity by offering outstanding values for high output speeds, fast first-page-out times, excellent print quality and multiple configuration and finishing options. And the IBM M20, M25 and M30 MFP Options help protect your printer investment by providing an affordable upgrade to copy, fax and network scan functionality for a scalable output solution.

For more information

To learn more about the IBM Infoprint 1130 and Infoprint 1140, as well as the M20, M25 and M30 MFP Options, contact IBM Printing Systems at 1 800 358-6661 (in North America), or visit:
